Career Objective

A highly motivated Computer Science and Engineering student seeking an entry-level position to leverage strong technical skills and a passion for web development and emerging technologies in a dynamic environment. Possesses problem-solving abilities, proficiency in Python, C, HTML & CSS, and effective communication skills, aiming to contribute to innovative software solutions and organizational growth.

Education

B.Tech - Computer Science and Engineering

Sumathi Reddy Institute of Technology for Women, Warangal

CGPA: 7.5 | Final Year

Technical Skills

- Programming Languages: C, Python, JAVA
- Web Technologies: HTML, CSS
- Database: SQL
- Core Skills: Problem Solving

Projects

Web Scraping for Real-Time Price Comparison

Developed a Python-based tool to extract and compare product prices from multiple e-commerce sites using Selenium and Requests libraries. Helped automate and optimize price monitoring and decision-making.

Smartphone Decoupling as a Mobile-Based Virtual Sensor

Developed a mobile-based virtual sensing system that utilizes smartphone sensors such as accelerometer, gyroscope, GPS, and proximity sensor to collect and analyze real-time motion and environmental data. Implemented sensor data decoupling techniques to improve accuracy, reduce noise, and enable independent processing of multiple sensor inputs.

Internships

Salesforce Developer Virtual Internship

Learned AI fundamentals, Agentforce basics, and Salesforce data governance concepts. Gained understanding of CRM workflows, automation, and cloud-based applications.

Certifications

Salesforce Virtual Internship Certificate - Salesforce

Introduction to OpenAI GPT Models - Infosys Springboard
